EDUCATION

- **University of Antioquia** *Currently*
  Bioengineering bachelor

- **Colegio San Buenaventura** *2015*
  High School, Bello - Antioquia - Colombia

EXPERIENCE

- **Raiices** *Jan 2024 - Currently*
  RPA Developer Medellin, Colombia
  – Developing new automated processes for local hospitals regarding administrative and insurance validation on their patients.
  – Updating and reviewing current processes to assert quality and functionality.

- **Tramisalud SAS** *Nov 2023 - Jan 2024*
  Support Engineer Medellin, Colombia
  – Attending client requests and bug reports on RPA develops on production.

PERSONAL PROJECTS

- **MedGear Supply** *Dec 2023*
  E-commerce website for a certification course on FullStack Development (FrontEnd and BackEnd develop)

  – Tools & technologies used: JavaScript, React, NodeJS, ExpressJS, MongoDB, Bootstrap
  – This project was developed for a boot camp, the main goal was to create a functional website for e-commerce called MedGear Supply where the main idea was to allocate different types of biomedical equipment to be sold in one place. (Acknowledge a new programming language and a lot of tools for web development)

- **E-Learning** *June 2024*
  E-Learning website for a college course on Web applications (FrontEnd and BackEnd develop)

  – Tools & technologies used: JavaScript, React, ViteJS, NodeJS, MongoDB, Tailwind, Python, Flask, Docker
  – As part of a group of people we created a website to simulate an online learning platform where it is possible to buy and have access to different online courses on different topics (We managed to create a working but unfinished version of the main idea by using another way to make the BackEnd for the website to work)

TECHNICAL SKILLS AND INTERESTS

Technical Skills: JavaScript, ReactJS, NodeJS, NoSQL, SQL, Python, Electroneek RPA
Soft Skills: communication, teamwork, time management, problem-solving, and adaptability
Field of Interest: FrontEnd and BackEnd development, RPA development
Hobbies: Sports, video-games, nature.
